## AD AND CADILLAC TOUR ICONIC ARCHITECTURE

A view of downtown Manhattan and One World Trade Center.

Last week, *Architectural Digest* and Cadillac hosted Driven by Design, a multi-stop tour of architectural highlights in Manhattan. Featured locations included the World Trade Center Complex, NeueHouse (a members-only workspace in Gramercy), a four-story Chelsea townhouse, and Cast Iron House, Shigeru Ban's forthcoming reimagining of a 19th-century cast iron building in Tribeca.

Michael Arad of Handel Architects and David M. Childs of SOM delivered keynote addresses about the National September 11 Memorial and One World Trade Center. The program kicked off earlier this month in Chicago, and will have stops in Dallas, Miami, and Los Angeles.
